

ABSTRACT

The main objective of the project is to create an online book store that allows users to search and purchase a book online based on title, author and subject. The selected books are displayed in a tabular format and the user can order their books online through cash on delivery. Using this web application, the user can purchase a book online instead of going out to a book store and wasting time.

Online Book store is an online web application where the customer can purchase books online. Through a web browser the customers can search for a book by its title or author, later can add to the shopping cart and finally purchase using cash on delivery. The user can login using his account details or new customers can set up an account very quickly. They should give the details of their name, contact number and shipping address.

The Administrator will have additional functionalities when compared to the common user. He can add, delete and update the book details, book categories, member information and also confirm a placed order.
